

REGIONAL ANAESTHESIA PRODUCT CATALOGUE

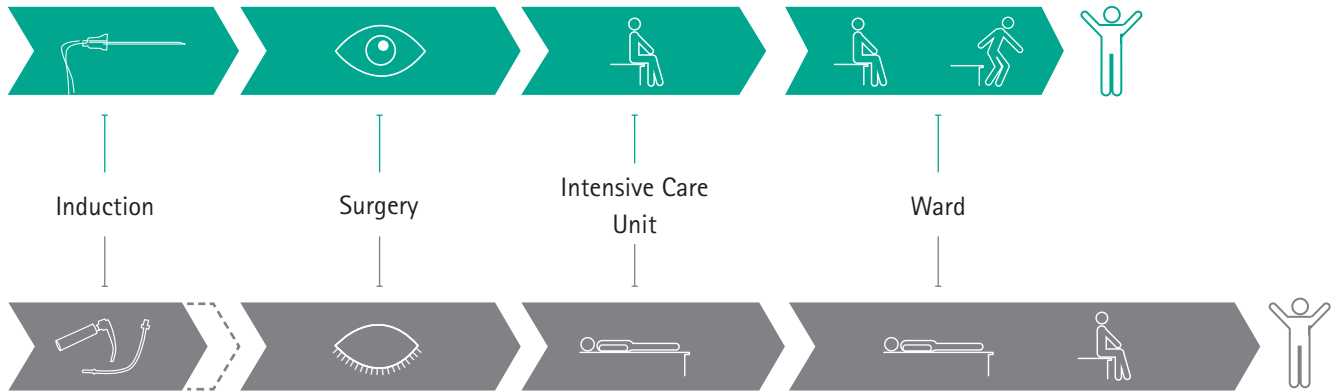

Optimise your processes

Thanks to Regional Anaesthesia

Regional anaesthesia is an essential part of pain therapy, as across several interventions, it offers clear advantages when compared to general anaesthesia.¹ For regional anaesthesia to become an important part of the peri-operative process, there are some prerequisites to consider, like the relevant indications, skilled personnel and the necessary internal processes at the clinic.

The rapid growth of use of regional anaesthesia and the numerous publications on the topic are both a testament to how regional anaesthesia can have a positive impact on both patient outcome and on efficiencies for the clinic.^{2,3}

WITH REGIONAL ANAESTHESIA

WITHOUT REGIONAL ANAESTHESIA

COMPARING TWO POTENTIAL INTERVENTIONS WITH AND WITHOUT REGIONAL ANAESTHESIA:

Looking holistically across the patient pathway, the establishment of regional anaesthesia processes appears to be a favourable investment. When regional anaesthesia is used, patients see better outcomes, faster mobilisation and consequently earlier discharge.^{4,5}

Reducing Risks of Misconnections in Regional Anaesthesia with NRFit®

MEDICAL DEVICE CONNECTORS FOR NEURAXIAL
& REGIONAL ANAESTHESIA APPLICATIONS
ARE CHANGING TO MEET INTERNATIONAL
DESIGN STANDARDS: ISO 80369-6.⁶

Regional Anaesthesia products with NRFit® connector

In line with the ISO Standard (International Organisation for Standardisation) for neuraxial and regional anaesthesia devices, B. Braun has developed a comprehensive portfolio with NRFit® connectors for the corresponding process steps.

Connecting what belongs together

» The ISO has identified several medical application areas for which specific ISO standards have been developed. These standards are part of the ISO 80369 series. Each standard will provide design and performance specifications for these connectors.¹

SPINAL ANAESTHESIA

A comprehensive portfolio of
needles in different bevel types
for spinal anaesthesia.

Products for Spinal Anaesthesia

Quality and Practicality

Ergonomic hub design for an individual and tactile handling position, better control of the needle and easy verification of bevel eye orientation.⁷

Thanks to our years of
EXPERIENCE
in the field, B. Braun offers spinal needles with a range of bevel types.

Spinocan® and Pencan® have the features you need to meet today's
EXACTING
Pain Control demands.

CSF-flashback identification due to the incorporated prism effect.

CSF FLASHBACK IDENTIFICATION

- Prism has a silver shine before CSF enters the hub **1**
- Prism turns transparent once CSF is in the hub **2**

Spinocan® with Quincke Bevel

- Sharp bevel for low puncture force⁷
- Fitted stylet: to reduce the risk of tissue coring and potential epidermoid tumor development⁸
- Prism included in the spinal needle hub, supports identification of CSF flashback

Spinal Introducer Needle

- Introducer needles providing needle guidance for the spinal needle during puncture⁷

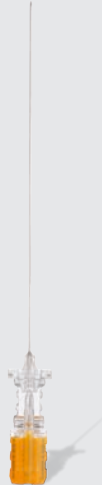

Pencan® with Pencil Point Bevel

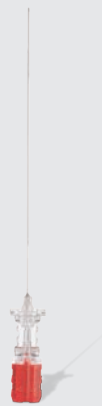

- Pencil point tip and opening design allows avoidance of incomplete blocks and helps reduce PDPH⁸
- Minimal intrathecal penetration depth⁷
- Identification of tissue structures due to detectable dura click^{7,9}
- Prism included in the spinal needle hub, supports identification of CSF flashback

EPIDURAL ANAESTHESIA

To meet individual preferences,
B. Braun offers a broad range of
epidural cannulas, catheters and
accessories for epidural anaesthesia.

Products for Epidural Anaesthesia

Quality and Practicality

Adapting to the unique anatomical challenges of each patient, it is important to use the appropriate needle and accessories.

B. Braun focuses on

QUALITY & PRACTICALITY.

Perican® Tuohy Needles

- For both continuous and single-shot techniques
- Different needle sizes (16 G, 18 G, 20 G, 22 G)
- With 1 cm graduation in length
- Polished inner bevel edge to reduce the risk of catheter shearing

USER BENEFITS:

- 1 cm marking to control the insertion depth
- High bending stiffness for control during needle advancement
- Fitted stylet: to reduce the risk of tissue coring and potential epidermoid tumor development¹¹

Products for Epidural Anaesthesia

Perifix® Catheters: Available with different characteristics – Soft-Tip and ONE

Perifix® Soft-Tip Catheter

- Soft-Tip catheter with a radiopaque tip
- Length 1000 mm
- Three micro-holes enhance the spread of anaesthetic drug
- Clear blue length markings embedded in catheter material
- Does not contain latex, DEHP or PVC
- MRI suitable

Perifix® ONE

- Epidural catheter with a relatively stiff but flexible shaft and a soft, atraumatic tip
- Length 1000 mm
- Six micro-holes enhance the spread of anaesthetic drug
- Three radiopaque enclosed yellow barium sulphate stripes for identification on x-ray images
- Does not contain latex, DEHP or PVC
- MRI suitable

Products for Epidural Anaesthesia

Perifix® Accessories

- Perifix® LOR-Syringe
- Easy-gliding plunger with good gliding characteristics and safety stop
 - Parabolic graduation to differentiate it from conventional syringes
 - Suitable for air and saline applications
 - Lock or slip connection

- Perifix® Filter with PinPad
- Filter fixation on patient in combination with self-adhesive PinPad
 - Filter reduces the risk of bacterial infections¹¹
 - Pressure resistant up to 7 bar

- Perifix® Catheter Connector
- Available in two sizes (19 G and 20/24 G)
 - Tactile and acoustic feedback upon closure
 - Viewing window allows for catheter insertion control to ensure a successful connection

- Perifix® Catheter Fixation
- Catheter fixation, consisting of fixation ring and non-woven cover foil
 - Easy examination of puncture site due to exchangeable cover foils

Products for Epidural Anaesthesia

Epidural Anaesthesia for the Smallest Patients

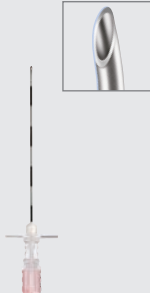

- Perican® Paed Epidural Needles
- Tuohy bevel
 - For continuous or single-shot techniques
 - Three different needle sizes (18 G, 20 G, 22 G)
 - 5 mm markings to control the insertion depth
 - Fitted stylets: to reduce the risk of tissue coring and potential epidermoid tumor development⁸

- Perifix® ONE Paed Epidural Sets
- Perifix® ONE Paed epidural sets in 20/24 G for newborns and infants, and 18/20 G for older children:
- Catheters with distance markings for paediatric use
 - For safe catheter insertion and position control
 - Catheter with markings each 1 cm in the space between 2 and 20 cm from the needle tip

Combined Spinal-Epidural Anaesthesia (CSE):

THE BENEFITS of Spinal and Epidural Anaesthesia in the Espocan® Sets

Special Pencan Tuohy Epidural needle with additional back eye in the Tuohy curve plus a Pencan Spinal needle with sleeve to centre the needle inside the epidural Tuohy needle.

- Tip of the spinal needle exits straight through the back eye of the Tuohy needle
- Docking system to hold the spinal needle in place
- Sleeved spinal needle for smooth exit through the back eye

- 1 Markings on the Spinal Needle**
The markings on the spinal needle show, when the tip leaves the back-eye.
- 2 USER BENEFITS**
 - The docking system allows rotation of the spinal needle even in the fixed position. Avoids the difficult and uncomfortable finger grip to steady fix the spinal needle in position
 - The docking system ensures fixation of the spinal needle inside the tuohy needle after successful dura puncture and injection of the local anaesthetic

PERIPHERAL NERVE BLOCKS

Whatever option you prefer -
wide ranged product portfolio for
stimulated and Ultrasound guided
peripheral nerve blocks.

Peripheral Nerve Block Portfolio

Quality and Functionality Without Compromise

ULTRASOUND
B. Braun offers a large product range of echogenic needles and catheters. Stimuplex® Ultra 360®, Ultraplex® 360® and ContiplexS® Ultra 360® are B. Braun's latest generation of Ultrasound needles that combines enhanced Ultrasound visibility with smooth gliding properties and a good puncture quality.¹¹

NERVE STIMULATION
For the electrical nerve stimulation B. Braun provides a wide range of stimulating needle and catheter systems for different applications. The well established nerve stimulator Stimuplex® HNS 12 completes the offer.

Visibility Without

The NeXt generations of Echogenic Nerve Block Needles

Circular (360°)
X-pattern-design

Reflection of the
Ultrasound waves

B. BRAUN ULTRASOUND NEEDLES
Stimuplex® Ultra 360®, Ultraplex® 360® and ContiplexS® Ultra 360® needles feature B. Braun's echogenic 360° X-pattern. The 'X' is a unique shape, also combined with a clear coating, it's intended to reflect more Ultrasound waves back to the probe than previous designs.¹²

The X-pattern is applied as a segmented safety-code (long-short-short-tip) and facilitates the needle tip identification. The Ultraline 360 portfolio is equipped with 30° back-cut bevel plus 360° X-shaped markings and a clear coating for better ultrasound visualisation and tip identification from all angles.¹³

NAVIGATION
For an easy identification of the needle tip, the X-pattern is strategically applied on the first 20 mm of the needle shaft to create the segmented code "long-short-short-tip". This enables distinction between the needle tip and the upper needle shaft.¹²

- USER BENEFITS**
- **Navigation:** Safety code for identification of the needle and needle tip position
 - **Visibility:** 360° X-pattern and clear coating result in better Ultrasound visualisation and tip identification compared to previous designs
 - **Tactile Feedback:** designed for consistent puncture – same 30° back-cut bevel as previous Stimuplex® Ultra and Ultraplex® needles

* Stimuplex® Ultra 360®, Ultraplex® 360® and ContiplexS® Ultra 360® are the latest generation of echogenic needles in the B. Braun range and not necessarily the latest generation of all echogenic needles available on the market

Products for Peripheral Nerve Blocks

Single Shot Needles

Stimuplex® and Ultraplex® single shot needles include navigation markings and an ergonomic design to provide tactile feedback and better needle tip positioning for consistent puncture.

- USER BENEFITS
- Improved design allowing better puncture and gliding characteristics
 - Broad portfolio of needle lengths from 35 to 150 mm and G 24 to G 20
 - Ergonomic needle hub design for enhanced tactile feedback

Products for Peripheral Nerve Blocks

Nerve Stimulation with the Stimuplex® HNS 12

1 Stimuplex® HNS 12 with SENSE

2 Stimuplex® Pen for cutaneous nerve mapping

B.Braun Nerve Stimulator – Stimuplex® HNS 12 with SENSE

What is SENSE?

In practice, marginal needle movements often lead to losing the muscle twitch. The SENSE technology (Sequential electrical Nerve Stimulation) is a sequence of two fixed impulse durations of 0.1 ms along with a third longer impulse duration.¹⁵ Most traditional nerve stimulators emit two very short pulses every second. That's because short pulses improve accuracy or specificity when closer to the nerve. The downside is that sensitivity, or the availability to elicit visual feedback at a distance from the nerve, is lost. SENSE technology increases both sensitivity and specificity by adding a third, longer pulse. This results in eliciting a motor response even when the needle is far from or not aimed directly at the nerve and requires less adjustment to the amperage control while retaining the visual feedback.

USER BENEFITS

- Stimulation with SENSE-technology designed for more efficient nerve stimulation¹⁵
- Menus designed for easy control of sound and other settings
- Acoustic signals inform the user of any relevant deviations

As the needle is advanced, SENSE generates two short and one long pulse. From the alternating sequence of three impulses, the third longer impulse stimulates the nerve already at a distance. One muscle twitch is visible and indicates that the needle is directed to the nerve.

The stimulation needle is further advanced towards the nerve while SENSE maintains the motor response. Current strength adjustments lead to definite reductions of the third impulse.

At the threshold level of approximately 0.5 mA three muscle twitches are visible as all three impulses stimulate the nerve.

PERIPHERAL NERVE BLOCKS

Xperius® Ultrasound System

Responsive | Advanced | Simple

Xperius® is an Ultrasound system jointly developed by B.Braun and Philips which has been specifically designed to support the current and future needs in regional anaesthesia and vascular access at the point of care.

RESPONSIVE

The system offers a high degree of mobility and flexibility combined with an ergonomic design to improve daily practice. A fully articulating arm allows easy adjustments of the Ultrasound monitor position and the angle of the screen for ergonomic use and better line of sight. Besides the cart based system, a dedicated ultra portable tablet device allows quick bedside scanning or interventions in your facility, on-the-go and at satellite locations.

ADVANCED

Xperius® provides high quality imaging of nerves and tissue structures for confident diagnoses and precise needle guidance. The predetermined settings (presets) are designed so you can spend less time adjusting controls and more time focusing on your patients.

SIMPLE

Xperius® – Allows you to quickly and comfortably conduct exams. Xperius® comes with intuitive touch and gesture controls that you already know from your smart devices – to keep your focus on your work and not on the controls. Its simple interface supports daily routines and provides specific presets for procedures in regional anaesthesia and vascular access.

Designed to fit seamlessly at the anaesthetist's point of care

- Ergonomic design
- Convenient accessory bins
- High mobility & portability
- Designed by Philips & B. Braun

High performance technology delivers exceptional image quality

- High definition imaging
- Enhanced needle visualisation
- New generation of probes

Easy to use touchscreen user interface

- Mobile ultrasound solution helps the user align the needle with the probe in a user-friendly interface that can lead to reduction in procedural time.¹⁶
- Intuitive user experience
- Touch screen & gesture control
- Dedicated regional anaesthesia & vascular access presets

Touchscreen User Interface & Advanced Technology

- Multiple presets – 4 specific ones for regional anaesthesia/vascular access
- Touchscreen User Interface
- Start scanning in a few seconds
- Built-in Wi-Fi for DICOM data transfer
- Needle Vis Technology

Ready-to-go for Bedside Scanning

- Long lasting battery up to 3 h of scanning
- Lightweight and easy to handle

Articulating Arm

- Flexible rotation in every direction (270°)
- Height-adjustable

Core Ultrasound Technology

- Transducer with USB connector

Convenient Storage

- Everything needed for procedures is within reach

Note: This product may not be available in your region. Please contact your local B. Braun representative for more information.

Onvision® Needle Tip Tracking

Precise | Predictable | Empowering

Onvision® is an Ultrasound based Needle-Tip tracking technology for peripheral nerve blocks which works exclusively with the Xperius® Ultrasound system and the dedicated Stimuplex® Onvision® needle. In real-time, Onvision® better indicates where the needle tip is inside the body, both in and out of plane. It helps users align the needle with the probe in an easy to use manner – to improve pain relief and minimise the risk of unintended nerve puncture or collateral damage to surrounding tissue or vessel.^{16,17,18}

Onvision® is an Ultrasound based Technology for reliable Needle Guidance

The dedicated Stimuplex® Onvision® needle is embedded with a tip sensor, which allows better detection of the tip location and displays this information in real time on the live Ultrasound image.¹¹

Needle-Tip tracking can be used in 2D Mode with the nerve 0-4 cm and the nerve 4-6 cm preset on the L12-4 transducer and nerve 6+ cm presets on the C5-2 transducer depending on the anatomical depth of the nerve.

ACCURATE

Know where you are in real-time^{16,17}

- Tip visualisation in both superficial and deeper blocks
- Ultrasound based detection and accuracy
- Can reduce complications during PNB placement
- Designed to prevent unintended overshooting

PREDICTABLE

Helping make first-time-right the new standard^{16,17}

- Confidently perform local anaesthetics injection
- Reduction in overall procedure time
- Fits in to current workflow (no workflow disruption)

EMPOWERING

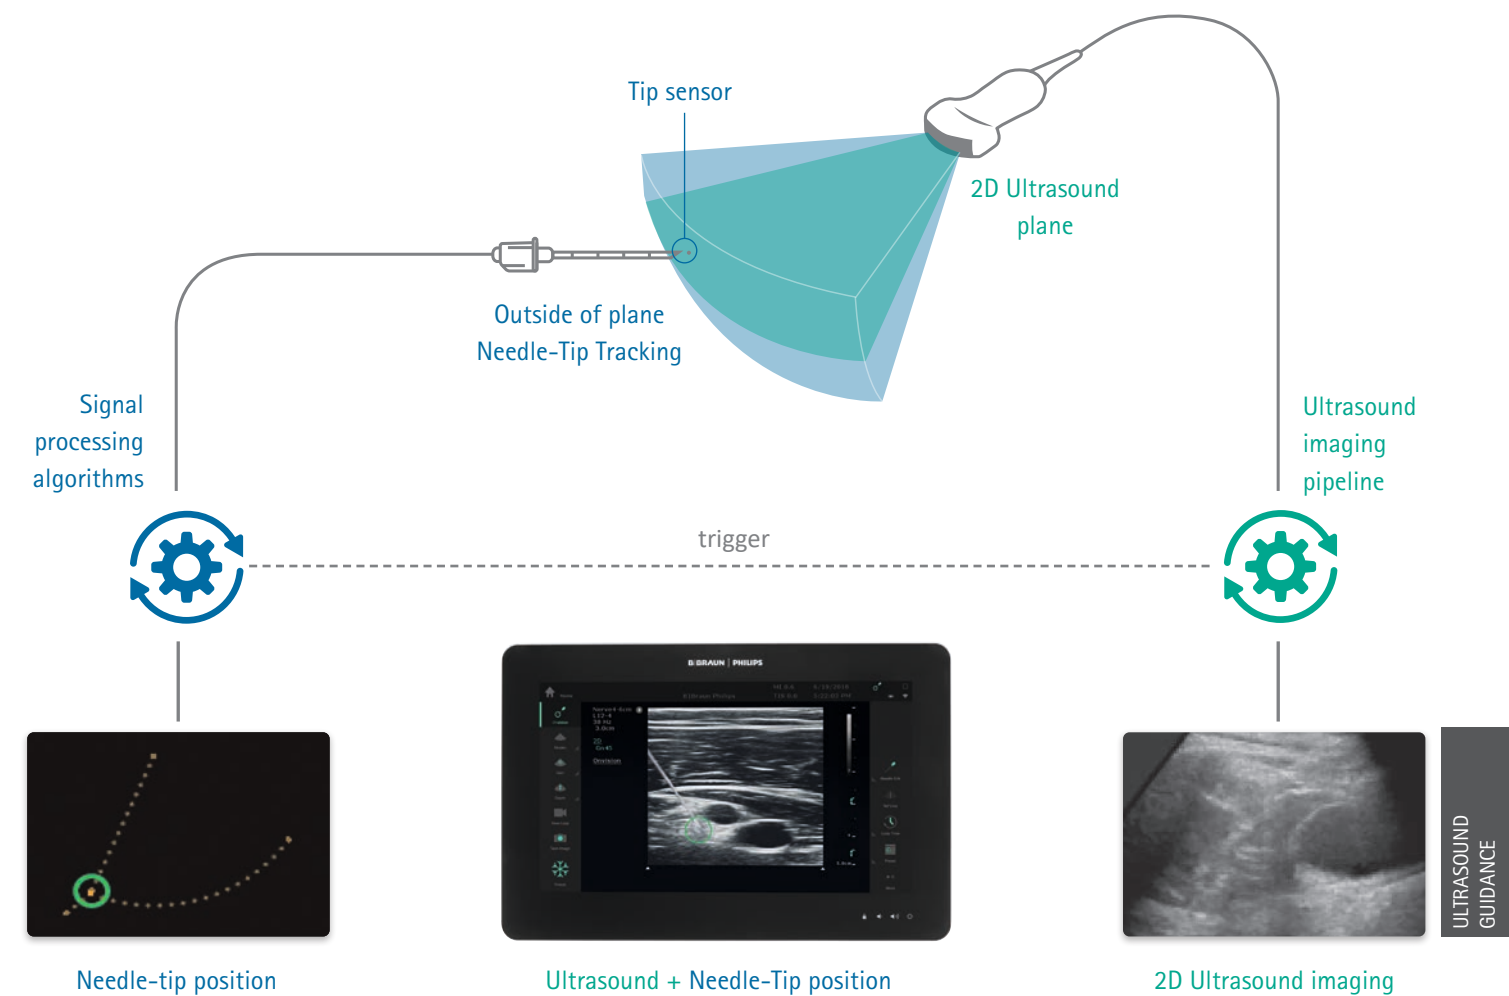

More anaesthetists can carry out regional anaesthesia¹⁸

- Better user experience
- Easy to adopt
- Can increase proficiency level

Note: This product may not be available in your region.
Please contact your local B. Braun representative for more information.

Needle Tip Navigation to the Point

With Onvision®, users experience a real time guidance which empowers them to quickly adopt and integrate PNB into their daily practice. Onvision® enables more physicians to be proficient in performing PNBs.¹⁹

Ultrasound based Technology to improve Accuracy¹⁹

- Onvision® works up to 12 cm
- Onvision® is shielded against electromagnetic interferences (EMI)
- Onvision® remains stable even when the needle bends
